 URL: <http://web.singnet.com.sg/~globalv>

Contact: HAROLD HEE, PRINCIPAL ARCHITECT

Formed in 2000, Global Village Architects is a small, IT-Driven practice which leverages on the strengths of like-minded designers across the region, connected via the Internet as the primary means to deliver their work. This allows the firm to draw on the strengths of its associates, while keeping the operation team size to a minimum. The firm, which is physically located in Singapore, plays the role of project integration, while still delivering projects of various sizes on its own resources. Each member of the team brings with them, their own area of expertise, and as such, contribute as resource units to the project requirements and removes all traditional boundaries of job hierarchies.
